- **Major:** Computer Science, B.C.S. GPA: 3.5
- **Coursework:** Program Concepts (Java), Program Design (C), OOP (C++), Data Structures (C), Analysis of Algorithms (C++), Robotics (Python), Logic Design, Computer Architecture

Employment

Software Developer	Vanguard	Jan 2021 - Current

- Implemented dashboard using Splunk logs to visualize our modernization effort's effectiveness.
- Integrated Honeycomb logging instruments in multiple projects to increase error logging efficiency.
- Completed AWS Cloud Practitioner certification.

Software Developer	Foundations IT	October 2018 - January 2021

- Designed and implemented an interface to build a customizable website, a shopping cart feature, and an onboarding flow for an e-commerce platform; written in Angular and .NET.
- Lead a team of three+ developers. Assigned new tasks, performed code-reviews, and provided guidance and feedback to teammates.
- Contributed to development standards documents and task management workflow and created Postman API scripts to improve testing accuracy and speed.
- Onboarded new team members - Set up environments, connected accounts, walkthrough of codebase.

Digital Specialist	Diamond Media Solutions	June 2017 - September 2017

- Designed and implemented Register and Login forms with form validation and error processing for a new proprietary CRM using Angular and Node.JS.
- Implemented internal Slack Chat Webhook for communicating with clients using contact form on CRM.
- Created HTML emails from PSD slices and setup email campaign for deployment using 3rd party CRM.

Software Developer Intern	Freenters Inc.	Spring 2016

- Successfully integrated two new login forms for users and advertisers using Angular and NodeJS.
- Created a user profile page for updating user data, completing forms, and performing CRUD ops.
- Improved website clarity, readability, and mobile responsiveness by completely refactoring all web pages.

Personal Projects

Personal Website: www.igoramidzic.com (for additional projects, details, and images)

Stock Trading App | Paper Trading
- Created a Paper Trading stock app with the ability to add fake money, buy & sell stocks, & see quotes.
- Used 3rd party resources, IEX Cloud API, to collect and query stock details, like latest price & quotes.
- **Tech:** Angular6, HTML/CSS, NodeJS, Express, MongoDB, Heroku for hosting, Typescript, IEX Cloud.

E-Commerce Site | White Nile (wn.igoramidzic.com)
- Developed a feature-rich web-based Music Player using Spotify's API and NodeJS.
- Added cross-platform playback control for all devices running Spotify's app; can control phone via web.
- Implemented Favorites, Recents, and Recommended Albums features like that of Spotify native.
- **Tech:** Angular6, HTML/CSS, Heroku for hosting, TypeScript, NodeJS, Spotify API.

Music Player | Spotify API (*needs Spotify Premium to view)* (mp.igoramidzic.com)
- Developed a feature-rich web-based Music Player using Spotify's API and NodeJS.
- Added cross-platform playback control for all devices running Spotify's app; can control phone via web.
- Implemented Favorites, Recents, and Recommended Albums features like that of Spotify native.
- **Tech:** Angular, HTML/CSS, Heroku, TypeScript, NodeJS, Spotify API.

Skills

- **Certifications:** AWS Cloud Practitioner
- **Languages:** *(proficient)*: C#, JavaScript, TypeScript, HTML, CSS *(knowledgeable)*: Python
- **Frameworks:** (*proficient*): Angular (2+), ASP.NET, NodeJS, Express
